

INSTALLATION GUIDE

IKISOFT OHADA STOCK EXTENSIONS

Banana Accounting Plus

Version: 1.0

Developer: Paulin KIKUAKUA MALANGU

Platform: Banana Accounting Plus

1. Introduction

This guide explains how to install and test the KIKSOFT OHADA STOCK EXTENSIONS developed for Banana Accounting Plus.

The package includes inventory management extensions based on OHADA stock valuation methods:

- FIFO
- LIFO
- CUMP After Each Entry
- CUMP End of Period

2. Package Contents

The ZIP package contains:

/extensions/

fifo_ohada.js

lifo_ohada.js

cump_after_entry.js

cump_end_period.js

/example/

stock_banana.ac2

result_fifo.pdf

result_lifo.pdf

result_cump_after_entry.pdf

result_cump_end_period.pdf

/documentation/

README.md

installation_guide.pdf

3. Requirements

Before installation, make sure you have:

- Banana Accounting Plus installed;
- Access to the Extensions management area;
- JavaScript extensions enabled.

4. Installation Steps

Step 1 – Extract the ZIP File

Extract the ZIP package into a local folder on your computer.

Example:

C:/KIKSOFT_OHADA_EXTENSIONS/

Step 2 – Open Banana Accounting Plus

Launch Banana Accounting Plus.

Step 3 – Import the Extensions

For each extension file:

1. Open Banana Accounting Plus;
2. Go to:
3. Extensions → Manage Extensions
4. Import the desired .js extension file.

Example:

- fifo_ohada.js
- lifo_ohada.js
- cump_after_entry.js
- cump_end_period.js

Step 4 – Open the Example File

Open the provided accounting example file:

stock_banana.ac2

This file contains sample inventory transactions for testing purposes.

Step 5 – Execute an Extension

To run an extension:

1. Go to:
2. Extensions
3. Select the desired extension;
4. Execute the script.

Example:

- FIFO OHADA
- LIFO OHADA
- CUMP After Each Entry
- CUMP End of Period

5. Expected Results

After execution, the extension generates:

- Stock valuation calculations;
- Inventory reports;
- Unit cost calculations;

- Remaining stock quantities;
- OHADA-oriented inventory outputs.

Sample PDF outputs are included in the package for comparison.

6. Test Recommendations

For optimal testing:

- Compare generated results with provided PDF reports;
- Verify stock quantities after each transaction;
- Test different inventory movement scenarios;
- Validate unit cost calculations.

7. Troubleshooting

Extension does not appear

- Verify that the .js file was imported correctly;
- Restart Banana Accounting Plus if necessary.

Calculation issue

- Verify inventory transaction data;
- Ensure the example file structure has not been modified.

Script execution error

- Confirm compatibility with Banana Accounting Plus;
- Verify JavaScript extension support is enabled.

8. Compatibility

Designed for:

- Banana Accounting Plus;
- OHADA inventory workflows;
- Educational and SME inventory management.

9. Developer Information
